

ADVANCED ELECTROLYSIS AFTERCARE

After your Advanced Electrolysis treatment small scabs will form over 48hours , these should be left DRY UNTIL THEY DROP OFF ON THEIR OWN (OVER THE NEXT 10 DAYS)

IF THE AREA IS LIKELY TO RUB , A PLASTER MAY BE PUT OVER IT. ENSURE AIR CAN CIRCULATE TO ALLOW THE SCAB TO FORM.

DO NOT PICK OFF ANY SCABS

Special Care must be taken not to upset the area and to avoid infection.

Apply a small amount of *antiseptic cream* to the area morning AND night.

No Make-up must be used until scabs have formed.

DON NOT ALLOW WATER ON TO THE AREA UNTIL THE SCABS HAVE DROPPED OFF

A check up appointment is vital so that the therapist can check over the area.

Over the next 10 days:

- Avoid extreme temperatures
- Avoid make-up over the area
- Avoid cleansers, toners or moisturisers
- Avoid hot baths, swimming, exercise
- Avoid bubble baths
- Avoid shampoo
- Avoid hair spray, perfume etc
- Avoid towels and flannels
- Avoid glasses, blows to the area
